VILLAGE OF PERRY RECEIVES GRANT

Jamie Herman | State Circuit Rider

On October 25, 2013, the New York Rural Water Association presented to the Village of Perry, NY, a check to purchase equipment to continue to provide fluoride to their drinking water supply for their customers. These funds were made available through the efforts of the staff at the NYS Department of Dental Health.

This funding was appropriated to assist communities with the cost of engineering and replacement equipment. NYRWA congratulates the Village of Perry on receiving this small grant.
