

VILLAGE OF ATHENS RECEIVES SMALL GRANT

Pat Scalera | CEO, NYRWA

On October 21, 2013, the New York Rural Water Association presented to the Village of Athens, NY, a check to purchase equipment to continue to provide fluoride to their drinking water supply for their customers. These funds were made available through the efforts of the staff at the NYS Department of Health – Bureau of Dental Health.

This funding was appropriated to assist communities with the cost of engineering and replacement equipment. NYRWA congratulates the Village of Athens on receiving this small grant.
